Document Scope, Criteria, and Use Cases

Document Objectives

Since the publication of the 2021 ESC Guidelines for the diagnosis and treatment of acute and chronic heart failure, there have been several randomized controlled trials that should change patient management ahead of the next scheduled full guideline. This 2023 Focused Update addresses changes in recommendations for the treatment of HF because of this new evidence. We considered new published evidence up until the 31 March 2023. After considering and discussing many new major randomized controlled clinical trials and meta-analyses, the Task Force voted to include those that would lead to Class IIa and I recommendations. This has led to us updating some of our guidance for the treatment of HFmrEF, HFpEF, comorbidities and Acute HF.

Scope

Diagnosis, Management, Treatment

Diseases/Conditions (MeSH)

D006333 - Heart Failure

D006333 - Heart Failure

Keywords

acute heart failure, heart failure

Inclusion Criteria

Male, Female, Adult, Older Adult

Health Care Settings

Ambulatory, Hospital, Outpatient

Intended Users

Nurse, Nurse Practitioner, Physician, Physician Assistant

Recommendation Development Processes & Methodology
